## Summary

---

Frontend Developer with nearly 2 years of experience building modern, responsive web applications using **React.js**, **Next.js**, **TypeScript**, and **Tailwind CSS**. Experienced in AI-driven platforms and enterprise HRMS systems, focusing on performance optimization, reusable components, and API-driven architecture.

## Experience

---

**Front End Developer**, StratAgile – Kochi

March 2024 – current

### AssetCraft AI - On going

Contributed to the development of Asset Craft AI, an AI-powered content generation platform that automates the creation of marketing materials such as emails, LinkedIn posts, PDFs, call scripts, and landing pages. Played a key role in building interactive, high-performance front-end interfaces using **Next.js**, **TypeScript**, and **Tailwind CSS**, integrating with LLM-based APIs for real-time, template-driven AI output.

- Developed responsive and scalable front-end applications using **Next.js** and **TypeScript**, enabling AI-based generation of emails, PDFs, landing pages, and social media content.
- Optimized frontend performance using advanced state management, lazy loading, and efficient rendering techniques to improve user experience.
- Built a cohesive and responsive design system using **Tailwind CSS**, ensuring visual consistency and accessibility across the platform.
- Participated in Agile sprints, code reviews, and feature planning, maintaining alignment with project timelines and quality standards.
- Contributed to improving frontend build performance and deployment pipelines, ensuring optimized production builds.

### HRMS - On going

Built and enhanced a full-fledged HRMS employee portal with features for attendance management, leave applications, employee directory, and HR calendar, ensuring a responsive, user-friendly, and high-performance interface using **React.js** and API-driven architecture.

- Built user-friendly HRMS modules including attendance tracking, leave management, employee directory, and calendar views using **React.js** and **Tailwind CSS**.
- Developed responsive UI components and reusable form/interactive elements aligned with design guidelines and HR workflows.
- Integrated **REST APIs** for attendance logs, leave balances, employee data, and holiday calendar.
- Designed interactive dashboards displaying employee statistics, joiners, leave status, holidays, and special working days.
- Optimized UI performance by minimizing renders, lazy loading components, and efficient state management.

## Projects

---

**CARSINE** The Car Detailing Booking Website

[Live Link](#)

- CARSINE is a car wash and detailing website. User can book their appointment by giving their information with required services they need.
- Tools Used: React Js, Node Js, MongoDB, Express Js, Restful API

**Hungry Eats** The Burger Joint website

[Live Link](#)

- A sleek, waiter-less restaurant system. Order through a digital menu, reserve tables, and self-checkout. Includes an admin panel for kitchen order review.
- Technology: React, Node.js, Json-server, RESTful API

## Skills

---

**Front-End Development:** HTML, CSS, JavaScript, TypeScript, React.js, Next.js

**Styling & UI Frameworks:** Tailwind CSS, SASS, Bootstrap, Material UI

**Back-End Development:** Node.js, Express.js

**Databases:** MongoDB, MySQL

**Version Control & Collaboration:** Git, GitHub

## Education

---

**APJ Abdul Kalam Technological University**, BTech in Mechanical Engineering

Aug 2015 – May 2019

- CGPA: 7.12
